

SHINER GAZETTE

VOL. XVIII.

SHINER, LAVACA COUNTY, TEXAS, THURSDAY MORNING, JUNE 29, 1911.

NO. 45.

There is a Difference Between Wagons

A cheap wagon looks about as good as a **Studebaker** when it is new,—but it won't compare with a **Studebaker** after several years wear;

And what is more,

The chances are that what you have paid on it for repairs, added to the original cost, would be more than we would ask for a new

Studebaker
WAGON

The cheap wagon is "played out" in a few years, But, The **Studebaker** will be practically as good as new. The prudent farmer buys the wagon that will do his work well and wear well. He buys a **Studebaker**.

OLIVIA.

A Split Log Drag Club.

A Split Log Drag Club is one of the latest organized movements for road building in Texas.

The territory covered by a club usually embraces about six miles of road and the farmers along the route join the club and they pay fifty cents membership dues per month. All the money received by the club is used in defraying the expenses of running a split log drag over the road when needed.

The county commissioners of Cooke county furnish free of charge to each club a split log drag of steel construction, which costs \$25.00 to build and the club stands the expense of operation. Cooke county now has eleven of these clubs in operation and the results are so satisfactory that the movement is rapidly spreading throughout the entire county.
